Project Description

Rewards token that distributes ETH. Uses the old style of dividend tracking, which ends up costing more gas. Well limited, with few permissions allowing the deployer to abuse the contract.

Developer's Submitted Description

EthZilla is a rewards token which takes 5% of each transaction and distributes it as ethereum rewards among all the holders. With the backing of a strong marketing team, a fun community and future utility, ETHZilla is promising to be a hidden gem.

HIGH – None

Medium – 2 Risks

Risk assessment is color-coded for convenience.

The risks are as follows, and their respective colors:

HIGH – SEVERE risk. Could either honeypot, rug, somehow scam the user, or prevent the contract from functioning as intended.

Medium – Could allow the owner to stop trading while being able to trade himself, make the user lose money, or something similar.

Low – Risks that could allow the owner to somehow have an edge, allow users he choose to have an edge, or the ability to manipulate the contract, prices, or something similar.

Minimal - Risks that are not potentially investment-threatening, but needs be mentioned anyway. This could include poor code or poor optimization, etc.

Security and Code

Limitless Exclusions [Low Risk]

The owner is able to set any address to be excluded from fees, rewards, or limits at any time.

Mutable Taxes [Low Risk]

The owner is able to change taxes, up to a limit of 20% total. This includes setting one tax to the maximum and all other taxes to 0. This could potentially divert all taxes to the marketing wallet, for example.

Always make sure to always inspect all values and variables.

This includes, but is not limited to:

- Ownership
- Proper Ownership Renouncement (if any)
- Taxes
- Transaction/Wallet Limits

I am not a good trader, I know nothing of Technical Analysis, and for the most part I do not trade. Despite my best efforts, I can never guarantee full safety, though I do my best to check for and announce all risks. There are many tricks and variations that unscrupulous people can enact even with safe contracts. Please always do your research.

I am only human, and I make mistakes as well.
