#### DISCLAIMER

THIS IS A SMART CONTRACT AUDIT, PAID FOR BY THE PROJECT OWNERS I HOLD NO ASSOCIATION, AFFILIATION, OR ANY RELATION TO THE PROJECT OR IT'S TEAM. NOTHING IN THIS REPORT IS FINANCIAL ADVICE. PLEASE DO YOUR OWN RESEARCH.

## **Project Description**

Rewards token that distributes BNB. Uses the old style of dividend tracking, which ends up costing more gas. Nothing special of note in terms of code, but it does allow you to "compound". Not necessarily actually compounding your rewards, but a simple taking your BNB rewards and swapping for the native token function.

## **Developer's Submitted Description**

Floki Rocket is a low tax frictionless yield token that gives one of the highest BNB rewards generated by any token on the Binance Smart Chain. By just simply holding Floki Rocket in your wallet, you will yield a generous passive income paid out in BNB.

## **Project Information**

#### Name

Floki Rocket

### **Launch Type**

Whitelisted Presale
Pinksale Platform

### **Telegram**

t.me/floki\_rocket\_official

#### Website

https://flokirocket.finance

#### **Taxes**

4% BNB Rewards3% Auto-Liquidity5% Marketing

#### **Token Distribution**

6% Private Sale6% Dev Team19% Ecosystem/CEX's (Vested) \*\*69% Presale + Liquidity

\*\* Please inspect all vesting locks, these are not checked in this audit.

#### **Launch Date**

#### Presale:

November 9th, 13:00 UTC

#### PancakeSwap:

November 10<sup>th</sup>, 13:00 UTC

## **Security Quick Report**

### Contract Analyzed [Solidity v. o.8.9]

https://bscscan.com/address/0x1476e96FAdb37668d768092 1297e2ab98Ec36c2F#code

HIGH – None Medium – 1 Risks Low – 3 Risks Minimal – No Risks

Risk assessment is color-coded for convenience. The risks are as follows, and their respective colors:

HIGH – SEVERE risk. Could either honeypot, rug, somehow scam the user, or prevent the contract from functioning as intended.

Medium – Could allow the owner to stop trading while being able to trade himself, make the user lose money, or something similar.

Low – Risks that could allow the owner to somehow have an edge, allow users he choose to have an edge, or the ability to manipulate the contract, prices, or something similar.

Minimal – Risks that are not potentially investment—threatening.

**Minimal** - Risks that are not potentially investment-threatening, but needs be mentioned anyway. This could include poor code or poor optimization, etc.

## **Security and Code**

### **Blacklist [Medium Risk]**

The owner is able to blacklist any user from trading, without limits. While this is flagged as a medium risk, if there is trust in the developer this can be ignored.

### **Limitless Exclusions [Low Risk]**

The owner is able to set any address to be excluded from fees, or rewards at any time without limit.

### **Changeable Router [Low Risk]**

The router can be changed to any address. If the new router is incorrectly setup, this would stop contract swaps and pause rewards. The risk is **Low** due to this only pausing the contract swaps, rather than exploiting them.

### **Poor Optimization [Low Risk]**

The solidity version used is out of date, and as such is missing critical features such as the intrinsic inclusion of checked math, among other bugfixes throughout the version.

The code is not well optimized. It uses the old style of tracking dividends. This gas burden then falls on the user to pay.

## **Security and Code**

## Pinksale Antibot [Note]

There is a Pinksale Antibot in place. This points to a contract that is unverified, and due to this, said contract code is not covered in this audit.

## **Closing Notes**

The only real risk in this contract is the blacklist. However, if there is trust in the team, this can be ignored. Please do your own research and ensure you have trust in the project and its team before investing.

Always make sure to always inspect all values and variables.

This includes, but is not limited to:

- Ownership
- Proper Ownership Renouncement (if any)
- Taxes
- Transaction/Wallet Limits
- Token Distributions
- Timelocks
- Liqudity Locks
- Any other owner-adjustable settings or variables.

## **Final Disclaimer**

I am solely a smart contract writer/auditor. I do not promote, own, or lead projects unless specifically and explicitly stated. I am not a good trader, I know nothing of Technical Analysis, and for the most part I do not trade. Despite my best efforts, I can never guarantee full safety, though I do my best to check for and announce all risks. There are many tricks and variations that unscrupulous people can enact even with safe contracts. Please always do your research.

I am only human, and I make mistakes as well.

Nothing written in this report is financial advice. Please make sure you are interacting with the correct socials below when contacting me, to avoid scamming impersonators.
