DISCLAIMER

Project Description

A standard ERC20 feeless, taxless, featureless tokens. It's only implementation of code other than standard ERC20 compliance is the Pinksale Antibot.

Developer's Submitted Description

StableDoc combines Blockchain-based and AI-driven telemedicine, in-home health, and standard hospital services to deliver evidence-based "Doctor Anywhere" healthcare services to our patients all around the world; using NFT in the depiction of Patient's Health Data.

Project Information

Name

StableDoc

Launch Type

Presale,
Pinksale Launchpad

Telegram

Taxes

None.

Token Distribution

8% Team
5% Advisors
8% Marketing
2% Indigent Patients
4% Foundation
1% Airdrop
5% Community Rewards
2% Reserve
15% Liqudity
50% Presale

Launch Date

Presale:
TBA
PancakeSwap:
TBA

Security Quick Report

Contract Analyzed [Solidity v. 0.7.6]

https://bscscan.com/address/0x543C7eBb52D56985f63F246A5b3558AFF79037d7#code

HIGH – None
Medium – None
Low – None
Minimal – None

**Risk assessment is color-coded for convenience.
The risks are as follows, and their respective colors:**

HIGH – SEVERE risk. Could either honeypot, rug, somehow scam the user, or prevent the contract from functioning as intended.
Medium – Could allow the owner to stop trading while being able to trade himself, make the user lose money, or something similar.
Low – Risks that could allow the owner to somehow have an edge, allow users he choose to have an edge, or the ability to manipulate the contract, prices, or something similar.
Minimal - Risks that are not potentially investment-threatening, but needs be mentioned anyway.

Security and Code

Featureless Token [No Risk]

This token is essentially featureless. As such, there are no inherent in-contract risks to speak of. It has no taxes, no fees, no functions that are specifically callable by the owner that change

PinkSale Antibot [Note]

The only non standard ERC20 code found within this contract is the PinkSale antibot. As the code is unverified, this report does not cover or detail anything concerning this feature, risks or otherwise.

According to Pinksale provided documents, there is a blacklist and several antibot features.

Outdated Solidity Version [Note]

While this poses no inherent risk, the Solidity version is somewhat outdated. Between 0.7.6 and 0.8.9 (current version at time of audit), there have been many bugfixes and internal changes. SafeMath is no longer required as of Solidity 0.8.0, for an example.

Closing Notes

Always make sure to always inspect all values and variables.

This includes, but is not limited to:

- Ownership

- Proper Ownership Renouncement (if any)

- Taxes

- Transaction/Wallet Limits

- Token Distributions

- Timelocks

- Liqudity Locks

- Any other owner-adjustable settings or variables.

Final Disclaimer

    I am solely a smart contract writer/auditor. I do not promote, own, or lead projects unless specifically and explicitly stated. I am not a good trader, I know nothing of Technical Analysis, and for the most part I do not trade. Despite my best efforts, I can never guarantee full safety, though I do my best to check for and announce all risks. There are many tricks and variations that unscrupulous people can enact even with safe contracts. Please always do your research.

    I am only human, and I make mistakes as well.

    Nothing written in this report is financial advice. Please make sure you are interacting with the correct socials below when contacting me, to avoid scamming impersonators.
